⚠ Accounting codes are used for team and club invoicing.

Most organizations create a new accounting code to more easily separate the financial reporting of this event from previous events. We recommend using a unique code for each event to keep billing separate. However, you can use the same accounting code across multiple events to consolidate team billing into fewer accounts for returning teams, but the reporting will be combined with the previous event's invoicing.

ALIGNMENTS

- **Tools have been added in the registration process to help with the aligning teams.**
- **The Games committee would like to ask that you use these tools to the fullest ability. These fields are essential for your team to be placed properly. Every season at least 50% of the comments are blank or have comments like "Lost Players". Everyone loses players, or "move down 1 division", when that team had a successful season.**
- **Many times, very little is written on the initial registration information and then Games will get a very long explanation during the ACRF process. The issue is at this point teams have received notification of their alignments, and it is very difficult to move teams at that time.**
- **Games Committee have 4 days to align 1300 teams with 10 volunteers. Please assist them by putting as much information as possible in the initial registration file.**
- **If there are any major changes to a team from the time of registration to the time of alignments, please send me an email letting me know the updated information, so we have it for the alignment.**

HAVE A GREAT FALL SEASON
